TapeTech® PROFESSIONAL DRYWALL FINISHING TOOLS

MWS01-TT

MOBILE WASH STATION

$499.00

The TapeTech® Mobile Wash Station is the lightest and most portable wash station available. It is the perfect solution for cleaning tools and equipment on the jobsite, especially when water supplies are limited.

Working from just a 5-gallon bucket of water, the Wash Station generates the ideal water pressure to effectively clean drywall finishing tools, paint brushes, rollers, pans and more! And the Wash Station helps finishers and painters comply with environmental laws by providing a convenient, professional wash station that does not wash the joint compound or paint into the soil.

The legs of the Wash Station open and close effortlessly for quick set up, break down and transport and weighs just 34 pounds.
